

HARSH SHUKLA

FULL STACK DEVELOPER | SOFTWARE ENGINEER

Dewas, Madhya Pradesh | [+91 90391 75086](tel:+919039175086) | hrsshhh17shukla06@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Computer Science undergraduate graduating in 2027 with hands-on experience building secure full-stack and AI-assisted web applications. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, Express.js, REST APIs, MongoDB, SQL, and modern 3D web development; focused on full-stack development roles.

EDUCATION

SAGE University, Institute of Advanced Computing | Indore, Madhya Pradesh

Bachelor of Technology in Computer Science and Engineering | 2023 - 2027 | CGPA: 7.00/10

Class XII: Saraswati Vidya Mandir | 2022-23 | 62.6% • Class X: Vindhyachal Academy | 2020-21 | 87%

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite

Backend and Data: Node.js, Express.js, REST APIs, MongoDB, Mongoose, MySQL, SQL, Supabase, PostgreSQL

Interactive Web: Three.js, React Three Fiber, Drei, GSAP, ScrollTrigger, Framer Motion

Tools and Foundations: Git, GitHub, Postman, Vercel, VS Code, Data Structures and Algorithms, DBMS

SELECTED PROJECTS

Converge | Next.js 16, React 19, TypeScript, Supabase, PostgreSQL, WebRTC, Gemini | [GitHub](#) | [Live](#)

- Built a private multi-workspace collaboration platform with feeds, direct and group chat, files, calendars, search, notifications, voice/video calls, meetings, and workspace-aware AI.
- Enforced tenant isolation through workspace-scoped data, PostgreSQL Row Level Security, membership-validating RPCs, private Realtime channels, and automated cross-workspace regression checks using 20 seeded demo accounts.

SupportFlow AI | Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Gemini API | [GitHub](#) | [Live](#)

- Developed a role-based customer-support workspace with authentication, ticket assignment, status workflows, threaded replies, private attachments, and an agent-managed knowledge base.
- Implemented a protected server-side Gemini workflow that creates source-cited reply drafts from published articles; secured data with RLS, signed file URLs, access checks, and database-backed rate limits.

AETHER | React, Vite, Three.js, GLSL, GSAP, Framer Motion | [GitHub](#) | [Live](#)

- Built a responsive AI-product concept with a custom WebGL particle system, GLSL shaders, scroll-driven geometry morphing, model and API interactions, accessible dialogs, and multi-step prototype checkout flows.

SONIC | React, Vite, Three.js, React Three Fiber, GSAP, Web Audio API | [GitHub](#) | [Live](#)

- Developed a multi-route festival platform with audio-reactive WebGL visuals, artist previews, ticket and merchandise flows, cinematic media, responsive navigation, SEO foundations, and reduced-motion support.

VEYRA | React, Vite, Tailwind CSS, Three.js, React Three Fiber, GSAP, REST APIs | [GitHub](#) | [Live](#)

- Created an immersive travel platform with destination search, live weather context, a 3D globe, curated journeys, responsive layouts, and personalized multi-day itinerary planning based on user preferences.

Velocity X132 | React, Vite, Three.js, React Three Fiber, GSAP, ScrollTrigger, Lenis | [GitHub](#) | [Live](#)

- Engineered an interactive WebGL motorcycle experience with scroll-synchronized 3D transformations and a responsive configurator supporting touch rotation, paint and material controls, and viewport-specific camera framing.

CERTIFICATION AND LANGUAGES

MongoDB Basics for Students | MongoDB, Inc. | Sep 2026 | [Verify](#)

Languages: Hindi (Native), English (Working proficiency)
